

LUMECCA IPL

PHOTOREJUVENATION FOR BROWN SPOTS, VESSELS & SUN DAMAGE

Clear & Beautiful Skin

IN 10 DAYS

MCKAY DERMATOLOGY & MEDSPA

what is LUMECCA

Lumecca is the most powerful intense pulsed light (IPL) to treat pigmented and vascular lesions. After just one use, patients notice significant improvements in the complexion and clarity of the skin. Lumecca operates using photothermolysis, which provides a photofacial through the delivery of a comfortable light treatment.

IMPROVES THE APPEARANCE OF:

- ✓ Age Spots
- ✓ Vascular Lesions
- ✓ Facial Telangiectasias (Spider Veins)
- ✓ Poikiloderma
- ✓ Rosacea (Redness)
- ✓ Freckles
- ✓ Sun Damage

in just 1-3 sessions!

results after just 1 treatment:

"My patients don't want to have six, seven or eight treatments. They would rather have one treatment that offers best results. We are able to achieve that with our Lumecca IPL."

FREQUENTLY ASKED QUESTIONS

Discover a superior solution to improve skin complexion, reduce skin irregularities and look years younger.

WHAT AREAS CAN BE TREATED?

Lumecca can be used on all areas of the body. The most common areas of treatment are zones that are regularly exposed to the sun. This often includes the face, neck, décolletage, legs, hands and arms.

WHAT STEPS MUST BE TAKEN BEFORE THE PROCEDURE?

Avoid direct, excessive sun exposure or tanning one month prior to treatment.

WHAT SHOULD I EXPECT DURING AND AFTER LUMECCA?

During treatment there will be a bright flash of light from the Lumecca that feels like a light elastic sensation. Redness and a slight warming of the skin are normal after treatment and usually subside within an hour. Over the next 24-48 hours you may see a darkening of the pigmented lesions, which will soon flake off, leading to an evening out of skin tone. After treating vascular lesions you may see the vein blanch and disappear or a color change in the vessel which will dissipate after a few days.

HOW MANY SESSIONS ARE REQUIRED?

An improved skin appearance can be noted after the first session. Multiple sessions provide even better results. Treatment regime depends on the severity of skin damage, skin type, type of treatment (vascular vs sun damage) and energy settings.

HOW QUICKLY WILL I SEE RESULTS?

Sun damage and skin complexion results can be seen a few days after the first session. The skin will continue to look younger and more brilliant over time with most visible results after 1-2 weeks. Having multiple photofacial sessions will improve the final result. For vascular treatments such as facial telangiectasias, results can be seen in up to 2 weeks.

ARE THERE ANY SIDE EFFECTS?

Most patients do not experience any side effects and any skin reaction usually resolves within a few hours. Patients may find they are sensitive to sunlight immediately after treatment. It is recommended to avoid direct sunlight and tanning.

THE ULTIMATE SOLUTION TO REJUVENATE YOUR SKIN IS AS EASY AS 1, 2, 3...

STEP
1

SCHEDULE A CONSULTATION

Meet with one of our providers to discuss the best treatment plan for your skin type and problem spots.

STEP
2

RECEIVE YOUR TREATMENT

Receive 1-3 Lumecca treatments in the comfort of our office.

STEP
3

ENJOY YOUR RENEWED SKIN

Watch as your skin improves over the next few days after your first treatment, continuing to improve for up to two weeks.

"I would definitely recommend Lumecca. I like how it brightened my face and gave me a beautiful glow. I can really see a difference."

– Pamela, Patient

"Lumecca is by far the best I have seen. One treatment has incredible results. It reduces age spots and skin irregularities as well as improving the skin complexion."
